

Controlled check

Scientific expectation

Response tokens that remain after a left crop should remain supervised.

Code `sft_dataset_wo_apply_template.py:170, 184`

Fixture `prompt = 10    response = 4    max_length = 8`

Implemented

0

Corrected

4

supervised response tokens

Released targets

Parsed **9,412 / 10,092 (93.3%)**

maximum observed sequence
3,945

official limit
8,192

Overlength among parsed targets: 0 / 9,412

The defect was not activated among the parsed released targets.
